

NEW

CanalPro™ Jeni

Guided Endodontic Motor

Your copilot in canal prep

Introducing COLTENE's revolutionary new motor. The **CanalPro Jeni's** innovative guidance system optimizes file motion and speed in real time, so you can **navigate every canal with confidence.**

Adaptive, multi-input
guidance technology

Integrated apex locator

Auditory irrigation cues
& file separation warnings

Preset & customizable
file settings

Large 7" touchscreen display

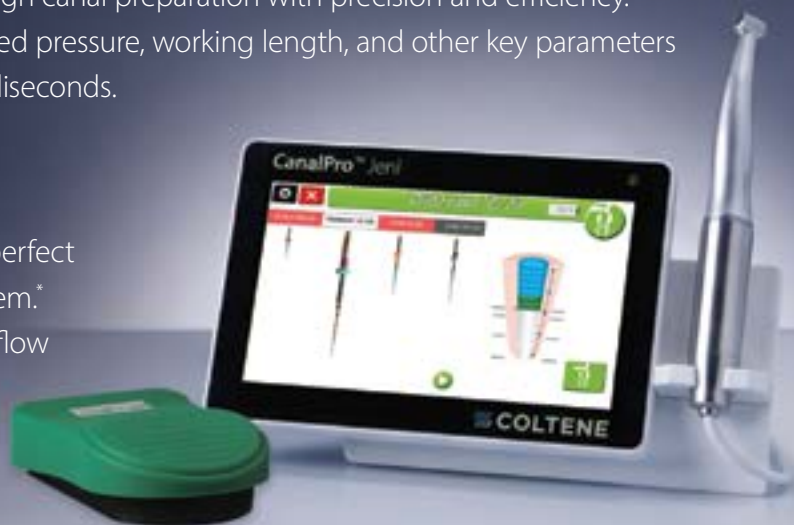

Cordless control unit
with Bluetooth foot pedal

The motor that's **one step ahead**

The CanalPro Jeni is designed to guide users through canal preparation with precision and efficiency. The system continuously monitors file stress, applied pressure, working length, and other key parameters – and adjusts file movement as needed within milliseconds.

CANALPRO JENI + HYFLEX™ EDM OGSF

The CanalPro Jeni is pre-programmed to work in perfect harmony with COLTENE's simple four-step file system.* Together, they enable a smooth, predictable workflow while helping clinicians manage complex cases with less guesswork.

**Compatible with all HyFlex files.*

"The CanalPro Jeni is a highly dependable motor that can be adapted to any technique. Its cutting-edge guidance technology helps maintain proper working length, minimizes the risk of file separation, and even reminds the user to irrigate."

Sam Alborz

Endodontist | Knoxville, Tennessee
